REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Board of Directors and Shareholders of Delta Electronics, Inc.

Introduction

We have reviewed the accompanying consolidated balance sheets of Delta Electronics, Inc. and its subsidiaries (the “Group”) as of September 30, 2013 and 2017, and the related consolidated statements of comprehensive income for the three-month and the nine-month periods then ended, as well as the related consolidated statements of changes in equity and of cash flows for the nine-month periods then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and International Accounting Standards (IAS) No. 34 “Interim Financial Reporting” as endorsed by the Financial Supervisory Commission (FSC). Our responsibility is to express a conclusion on these interim financial statements based on our reviews and the review reports of other independent accountants.

Scope of Review

Except as explained in the Basis for Qualified Conclusion, we conducted our reviews in accordance with the Generally Accepted Auditing Standards (GAAS) No. 65, “Review of Financial Statements”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As explained in Notes 4(3)B and 6(8), the financial statements of certain insignificant consolidated subsidiaries and investments accounted for under equity method were not reviewed by independent accountants. Those statements reflect total assets (including investments accounted for under equity

method) of \$22,971,297 thousand and \$22,777,757 thousand, constituting 8.98% and 8.82% of the consolidated total assets, and total liabilities of \$8,477,566 thousand and \$8,327,477 thousand, constituting 6.91% and 6.30% of the consolidated total liabilities as of September 30, 2018 and 2017, respectively, and total comprehensive income of \$224,402 thousand and \$430,978 thousand, constituting 4.53% and 7.06% of the consolidated total comprehensive income for the three-month periods then ended, respectively, and \$308,055 thousand and \$418,638 thousand, constituting 2.39% and 4.36% of the consolidated total comprehensive income for the nine-month periods then ended, respectively.

Qualified Conclusion

Based on our reviews and the review reports of other independent accountants, except for the possible effects of the matter described in the Basis for Qualified Conclusion section of our report, nothing has come to our attention that causes us to believe that the accompanying interim financial statements does not present fairly, in all material respects, the consolidated financial position of the Group as at September 30, 2018 and 2017, and of its consolidated financial performance for the three-month and the nine-month periods then ended and its consolidated cash flows for the nine-month periods then ended in accordance with the “Rules Governing the Preparation of Financial Reports by Securities Issuers” and IAS No. 34 “Interim Financial Reporting” as endorsed by the FSC.

Other Matter – Review Reports By Other Independent Accountants

We did not review the financial statements of certain consolidated subsidiaries and investment accounted for under the equity method, which statements reflect total assets amounting to \$4,143,755 thousand, constituting 1.62% of the consolidated total assets as of September 30, 2018, and total revenues amounting to \$1,295,582 thousand and \$3,778,757 thousand, constituting 2.04% and 2.19% of total revenues for the three-month and the nine-month periods then ended, respectively. The investment accounted for under the equity method amounted to \$8,049,385 thousand and \$7,180,140 thousand, constituting 3.15% and 2.78% of the consolidated total assets as of September 30, 2018 and 2017, respectively, and the comprehensive income under equity method was \$415,043 thousand and \$376,123 thousand, constituting 8.38% and 6.16% of the consolidated total comprehensive income for the three-month periods then ended, respectively, and \$154,491 thousand and \$699,555 thousand, constituting

資誠

1.20% and 7.28% of the consolidated total comprehensive income for the nine-month periods then ended, respectively. Those financial statements were reviewed by other independent accountants whose reports thereon have been furnished to us, and our conclusion expressed herein, is based solely on the review reports of the other independent accountants.

The consolidated financial statements of Delta Electronics, Inc. and subsidiaries as of and for the nine-month period ended September 30, 2018 expressed in US dollars are presented solely for the convenience of the reader and were translated from the financial statements expressed in New Taiwan dollars using the exchange rate of \$30.525 to US\$1.00 at September 30, 2018. This basis of translation is not in accordance with International Financial Reporting Standards, International Accounting Standards, and relevant interpretations and interpretative bulletins that are ratified by the FSC.

 EXCEPT AS OTHERWISE INDICATED)
 (UNAUDITED)

1. HISTORY AND ORGANISATION

Delta Electronics, Inc. (the Company) was incorporated as a company limited by shares under the provisions of the Company Law of the Republic of China (R.O.C.). The Company and its subsidiaries (collectively referred herein as the Group) are global leaders in power and thermal management solutions and are primarily engaged in the research and development, design, manufacturing and sale of electronic control systems, DC brushless fans, thermal system, and miniaturization key component, industrial automation products, digital display products, communication products, consumer electronics products, energy-saving lighting application, renewable energy applications, EV charging, energy technology services and consulting services of building management and control solutions, etc. The Group's mission statement, to provide innovative, clean and energy-efficient solutions for a better tomorrow, focuses on addressing key environmental issues such as global climate change. With the concern for the environment, the Group continues to develop innovative energy-efficient products and solutions. In recent years, the Group has transformed from a product provider towards a solution provider and the Group's business is segregated into power electronics business, automation business, and infrastructure business.

2. THE DATE OF AUTHORISATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORISATION

These consolidated financial statements were reported to the Board of Directors on October 29, 2018.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards ("IFRS") as endorsed by the Financial Supervisory Commission ("FSC")

New standards, interpretations and amendments endorsed by FSC effective from 2018 are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by International Accounting Standards Board</u>
Amendments to IFRS 2, 'Classification and measurement of share-based payment transactions'	January 1, 2018
Amendments to IFRS 4, 'Applying IFRS 9, Financial instruments with IFRS 4, Insurance contracts'	January 1, 2018
IFRS 9, 'Financial instruments'	January 1, 2018
IFRS 15, 'Revenue from contracts with customers'	January 1, 2018
Amendments to IFRS 15, 'Clarifications to IFRS 15, Revenue from contracts with customers'	January 1, 2018

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IAS 7, 'Disclosure initiative'	January 1, 2017
Amendments to IAS 12, 'Recognition of deferred tax assets for unrealised losses'	January 1, 2017
Amendments to IAS 40, 'Transfers of investment property'	January 1, 2018
IFRIC 22, 'Foreign currency transactions and advance consideration'	January 1, 2018
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 1, 'First-time adoption of International Financial Reporting Standards'	January 1, 2018
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 12, 'Disclosure of interests in other entities'	January 1, 2017
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IAS 28, 'Investments in associates and joint ventures'	January 1, 2018

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

A. IFRS 9, 'Financial instruments'

- (a) Classification of debt instruments is driven by the entity's business model and the contractual cash flow characteristics of the financial assets, which would be classified as financial asset at fair value through profit or loss, financial asset measured at fair value through other comprehensive income or financial asset measured at amortised cost. Equity instruments would be classified as financial asset at fair value through profit or loss, unless an entity makes an irrevocable election at inception to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument that is not held for trading.
- (b) The Group has elected not to restate prior period financial statements using the modified retrospective approach under IFRS 9. For details of the significant effect as at January 1, 2018, please refer to Note 12(4)B.

B. IFRS 15, 'Revenue from contracts with customers' and amendments

- (a) IFRS 15, 'Revenue from contracts with customers' replaces IAS 11, 'Construction contracts', IAS 18, 'Revenue' and relevant interpretations. According to IFRS 15, revenue is recognised when a customer obtains control of promised goods or services. A customer obtains control of goods or services when a customer has the ability to direct the use of, and obtain substantially all of the remaining benefits from, the asset.

The core principle of IFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity recognises revenue in accordance with that core principle by applying the following steps:

Step 1: Identify contracts with customer

Step 2: Identify separate performance obligations in the contract(s)

Step 3: Determine the transaction price.

Step 4: Allocate the transaction price.

Step 5: Recognise revenue when the performance obligation is satisfied.

Further, IFRS 15 includes a set of comprehensive disclosure requirements that requires an entity to disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers.

(b) The Group has elected not to restate prior period financial statements and recognised the cumulative effect of initial application as retained earnings at January 1, 2018, using the modified retrospective approach under IFRS 15. The significant effects of adopting the modified transition as of January 1, 2018 are summarised below:

i. Presentation of assets and liabilities in relation to contracts with customers

In line with IFRS 15 requirements, the Group changed the presentation of certain accounts in the balance sheet as follows:

(i) Under IFRS 15, customer contracts whereby services have been rendered but not yet billed are recognised as contract assets, but were previously presented as part of accounts receivable in the balance sheet. As of January 1, 2018, the balance amounted to \$1,670,189.

(ii) Under IFRS 15, liabilities in relation to expected volume discounts and refunds to customers are recognised as refund liabilities (shown as other current liabilities), but were previously presented as accounts receivable - allowance for sales returns and discounts in the balance sheet. As of January 1, 2018, the balance amounted to \$700,032.

(iii) Under IFRS 15, liabilities in relation to customer contracts are recognised as contract liabilities, but were previously presented as advance sales receipts in the balance sheet. As of January 1, 2018, the balance amounted to \$1,693,773.

ii. Please refer to Note 12(5) for other disclosures in relation to the first application of IFRS 15.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2019 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 9, 'Prepayment features with negative compensation'	January 1, 2019
IFRS 16, 'Leases'	January 1, 2019
Amendments to IAS 19, 'Plan amendment, curtailment or settlement'	January 1, 2019
Amendments to IAS 28, 'Long-term interests in associates and joint ventures'	January 1, 2019
IFRIC 23, 'Uncertainty over income tax treatments'	January 1, 2019
Annual improvements to IFRSs 2015-2017 cycle	January 1, 2019

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

IFRS 16, 'Leases'

IFRS 16, 'Leases', replaces IAS 17, 'Leases' and related interpretations and SICs. The standard requires lessees to recognise a 'right-of-use asset' and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures to be provided by lessors.

(3) Effect of IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 3, 'Definition of a business'	January 1, 2020
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by International Accounting Standards Board
IFRS 17, 'Insurance contracts'	January 1, 2021

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Except for the compliance statement, basis of preparation, basis of consolidation and increased sections as below, the significant accounting policies are identical to those disclosed in the consolidated financial statements for the year ended December 31, 2017. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

- A. The consolidated financial statements of the Group have been prepared in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Accounting Standard 34, “Interim financial reporting” as endorsed by the FSC.
- B. These consolidated financial statements should be read along with the consolidated financial statements for the year ended December 31, 2017.

(2) Basis of preparation

- A. Except for the following items, the consolidated financial statements have been prepared under the historical cost convention:
 - (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
 - (b) Financial assets/liabilities at fair value through other comprehensive income.
 - (c) Liabilities on cash-settled share-based payment arrangements measured at fair value.
 - (d) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.
- B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.
- C. In adopting IFRS 9 and IFRS 15 effective January 1, 2018, the Group has elected to apply modified retrospective approach whereby the cumulative impact of the adoption was recognised as retained earnings or other equity as of January 1, 2018 and the financial statements for the year ended December 31, 2017 and the nine months ended September 30, 2017 were not restated. The financial statements for the year ended December 31, 2017 and the nine months ended September 30, 2017 were prepared in compliance with International Accounting Standard 39 (‘IAS 39’), International Accounting Standard 11 (‘IAS 11’), International Accounting Standard 18 (‘IAS 18’) and related financial reporting interpretations. Please refer to Notes 12(4) and (5) for details of significant accounting policies and details of significant accounts.

(3) Basis of consolidation

- A. Basis for preparation of consolidated financial statements:
 - (a) All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the

entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.

- (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries are consistent with the policies adopted by the Group.
- (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
- (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
- (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss, on the same basis as if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

B. Subsidiaries included in the consolidated financial statements:

(4) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income. Financial assets at amortised cost or fair value through other comprehensive income are designated as at fair value through profit or loss at initial recognition when they eliminate or significantly reduce a measurement or recognition inconsistency.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.
- D. The Group recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(5) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. They are initially recognised at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value. The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(6) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.
- C. The Group's operating pattern of accounts receivable that are expected to be factored is for the purpose of selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognised in profit or loss.

(7) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income including accounts receivable or contract assets that have a significant financing component, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(8) Financial liabilities at fair value through profit or loss

- A. Derivatives are categorised as financial liabilities held for trading unless they are designated as hedges.
- B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.

(9) Non-hedging and embedded derivatives

- A. Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.
- B. Under the financial assets, the hybrid contracts embedded with derivatives are initially recognised as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and financial assets at amortised cost based on the contract terms.
- C. Under the non-financial assets, whether the hybrid contracts embedded with derivatives are accounted for separately at initial recognition is based on whether the economic characteristics and risks of an embedded derivative are closely related in the host contract. When they are closely related, the entire hybrid instrument is accounted for by its nature in accordance with the applicable standard. When they are not closely related, the derivative is accounted for differently from the host contract as derivative while the host contract is accounted for by its nature in

accordance with the applicable standard. Alternatively, the entire hybrid instrument is designated as financial liabilities at fair value through profit or loss upon initial recognition.

(10) Hedge accounting

- A. At the inception of the hedging relationship, there is formal designation and documentation of the hedging relationship and the Group's risk management objective and strategy for undertaking the hedge. That documentation shall include identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements.
- B. The Group designates the hedging relationship as follows:
- (a) Cash flow hedge: a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction.
 - (b) Hedge of a net investment in a foreign operation.
- C. Cash flow hedges
- (a) The cash flow hedge reserve associated with the hedged item is adjusted to the lower of the following (in absolute amounts):
 - i. The cumulative gain or loss on the hedging instrument from inception of the hedge; and
 - ii. The cumulative change in fair value of the hedged item from inception of the hedge.
 - (b) The effective portion of the gain or loss on the hedging instrument is recognised in other comprehensive income. The gain or loss on the hedging instrument relating to the ineffective portion is recognised in profit or loss.
 - (c) The amount that has been accumulated in the cash flow hedge reserve in accordance with (a) is accounted for as follows:
 - i. If a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability, or a hedged forecast transaction for a non-financial asset or non-financial liability becomes a firm commitment for which fair value hedge accounting is applied, the Group shall remove that amount from the cash flow hedge reserve and include it directly in the initial cost or other carrying amount of the asset or liability.
 - ii. For cash flow hedges other than those covered by i. above, that amount shall be reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment in the same period or periods during which the hedged expected future cash flows affect profit or loss.

- iii. If that amount is a loss and the Group expects that all or a portion of that loss will not be recovered in one or more future periods, it shall immediately reclassify the amount that is not expected to be recovered into profit or loss as a reclassification adjustment.
 - (d) When the hedging instrument expires, or is sold, terminated, exercised or when the hedging relationship ceases to meet the qualifying criteria, if the forecast transaction is still expected to occur, the amount that has been accumulated in the cash flow hedge reserve shall remain in the cash flow hedge reserve until the forecast transaction occurs; if the forecast transaction is no longer expected to occur, the amount shall be immediately reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment.
- D. Hedges of a net investment in a foreign operation
- (a) It is accounted for similarly to cash flow hedges.
 - (b) The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in other comprehensive income. The ineffective portion is recognised in profit or loss.
 - (c) The cumulative gain or loss on the hedging instrument relating to the effective portion of the hedge that has been accumulated in the foreign currency translation reserve shall be reclassified from equity to profit or loss as a reclassification adjustment.

(11) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or

substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

- D. Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.
- F. A deferred tax asset shall be recognised for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilised.
- G. The interim period income tax expense is recognised based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.
- H. If a change in tax rate is enacted or substantively enacted in an interim period, the Group recognises the effect of the change immediately in the interim period in which the change occurs. The effect of the change on items recognised outside profit or loss is recognised in other comprehensive income or equity while the effect of the change on items recognised in profit or loss is recognised in profit or loss.

(12) Revenue recognition

A. Sales of goods

- (a) The Group manufactures and sells computers, information technology, electrical machines, power supply and related components products. Sales are recognised when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.

- (b) Sales revenue is recognised based on the price specified in the contract, net of the estimated discounts and allowances. The revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. No element of financing is deemed present as the control was transferred with a credit term of 30 to 90 days, which is consistent with market practice.
- (c) The Group's obligation to provide a refund for faulty products under the standard warranty terms is recognised as a provision.
- (d) A receivable is recognised when the control of goods are transferred as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Installation of software and module services

- (a) The Group provides installation of some software and module services. Revenue from providing services is recognised in the accounting period in which the services are rendered. For fixed-price contracts, revenue is recognised based on the actual service provided to the end of the reporting period as a proportion of the total services to be provided. This is determined based on the actual cost spent relative to the total expected cost. The customer pays at the time specified in the payment schedule. If the services rendered exceed the payment, a contract asset is recognised. If the payments exceed the services rendered, a contract liability is recognised.
- (b) Some contracts include sales and installation services of equipment. The equipment and the installation services provided by the Group are not distinct and are identified to be one performance obligation satisfied over time since the installation services involve significant customisation and modification.
- (c) The Group's estimate about revenue, costs and progress towards complete satisfaction of a performance obligation is subject to a revision whenever there is a change in circumstances. Any increase or decrease in revenue or costs due to an estimate revision is reflected in profit or loss during the period when the management becomes aware of the changes in circumstances.

C. Incremental costs of obtaining a contract

Given that the contractual period lasts less than one year, the Group recognises the incremental costs of obtaining a contract as an expense when incurred although the Group expects to recover those costs.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

Except for the adoption of IFRS 9 for the impairment of financial assets - equity investment, there has been no other significant accounting judgement. For the rest of the information, please refer to Note 5 in the consolidated financial statements for the year ended December 31, 2017.

The Group entered into forward exchange contracts and cross currency swap to manage exposures to foreign exchange rate fluctuations of import or export sales and dividend distribution between subsidiary and second-tier subsidiary. However, the forward exchange transactions did not meet the criteria for hedge accounting. Therefore, the Group did not apply hedge accounting.

C. The Group has no financial assets at fair value through profit or loss pledged to others.

D. Information relating to credit risk is provided in Note 12(2) C(b).

E. The information on financial assets at fair value through profit or loss as of December 31, 2017 and September 30, 2017 is provided in Note 12(4).

A. The Group has elected to classify investments that are considered to be strategic investments as financial assets at fair value through other comprehensive income. The fair value of such investments amounted to \$2,979,452 as at September 30, 2018.

B. In the third quarter of 2018, the Group sold listed stocks whose fair value was \$90 to adjust the stock position, resulting to an accumulated loss on disposal of \$239.

C. Amounts recognised in profit or loss and other comprehensive income in relation to the financial assets at fair value through other comprehensive income are listed below:

	<u>Three months ended September 30, 2018</u>
<u>Equity instruments at fair value through other comprehensive income</u>	
Fair value change recognised in other comprehensive income	<u>\$ 5,228</u>

<u>Equity instruments at fair value through other comprehensive income</u>	
Fair value change recognised in other comprehensive income	(\$ <u>691,801</u>)
Cumulative gains (losses) reclassified to retained earnings due to derecognition	(\$ <u>239</u>)

- D. As at September 30, 2018, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the financial assets at fair value through other comprehensive income held by the Group was \$2,979,452.
- E. The Group has no financial assets at fair value through other comprehensive income pledged to others as collateral.
- F. Information relating to credit risk of financial assets at fair value through other comprehensive income is provided in Note 12(2).
- G. The information on available-for-sale financial assets and financial assets at cost as of December 31, 2017 and September 30, 2017 is provided in Note 12(4).

(4) Hedging financial assets and liabilities

- A. As of September 30, 2018, the balance of financial assets and liabilities used for hedging was \$0.
- B. Information on cash flow hedges and hedges of net investments in foreign operations recognised as profit or loss and other comprehensive income:

	<u>Cash flow hedges</u>	<u>Hedges of net investments in foreign operations</u>

At September 30, 2018	<u>\$ -</u>	<u>\$ 141,984</u>

- (a) The purpose of hedge accounting is that the hedged highly probable forecast transactions denominated in foreign currency are expected to occur during the next 12 months. Amounts accumulated in other comprehensive income as of September 30, 2018 are recycled into profit or loss in the period or periods when the hedged item affects profit or loss.

(b) When the hedging instrument expires and the hedging relationship ceases to meet the qualifying criteria, if the forecast transaction is still expected to occur, the amount that has been accumulated in the cash flow hedge reserve shall remain in the cash flow hedge reserve until the forecast transaction occurs; if the forecast transaction is no longer expected to occur, the amount shall be immediately reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment.

(c) Hedges of net investments in foreign operations

In the first quarter of 2018, due to the reorganisation of the Group, the risk of USD exchange rate fluctuating by fair value initially designated as hedged items of hedges of net investments in foreign operations was no longer material. Consequently, the hedge relationship did not meet the conditions of hedge accounting. The effective portion of hedges of net investments in foreign operations was accumulated in other equity previously. Since the foreign operations was not disposed, it was not reclassified from equity to profit or loss.

C. The information on December 31, 2017 and September 30, 2017 is provided in Note 12(4).

	<u>\$ 1,078,634</u>	<u>\$ 386,823</u>	<u>\$ 386,823</u>

Acquisition prices in business combination are calculated based on the price of acquisition and direct costs for related acquisition. The amount of goodwill recognised is the difference of the acquisition prices less net fair value of identifiable assets acquired. The amortisation duration of acquisition price may not exceed one year after the acquisition.

- D. As of September 30, 2018, the Group's goodwill arose from business combinations amounting to \$19,911,151 in order to improve benefit comprising of potential customer relations and operating revenue in the location of acquired companies. Based on IAS 36, goodwill acquired in a business combination should be tested at least annually for impairment. For the impairment testing of goodwill, goodwill acquired in a business combination is allocated to each of the cash-generating units that are expected to benefit from the synergies of the business combination. Each company may be a cash-generating unit which can generate independent cash flows and the impairment of goodwill is calculated based on value in use and carrying amount of net assets of each company.

For the calculated value of share right based on the analysis report issued by experts hired by the merged company when the business combination occurred, the analyzed information of value in use of each company was evaluated based on financial projections of operating revenue by product for each company. The consolidated financial statements would indicate how much of the projected revenues had been achieved based on the financial statements for the comparative period in 2018 and 2017.

The recoverable amount of all cash-generating units calculated using the value-in-use exceeded their carrying amount, so goodwill was not impaired. The key assumptions used for value-in-use calculations are operating profit margin growth rate and discount rate.

Management determined budgeted operating profit margin based on past performance and its expectations of market development. The weighted average growth rates used are consistent with the forecasts included in industry reports. The discount rates used are pre-tax and reflect specific risks relating to the relevant operating segments.

(16) Pensions

A. Defined benefit plans

(a) The Group has a defined benefit pension plan as follows:

The Company and its domestic subsidiaries have a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company and its domestic subsidiaries contribute monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company and its domestic subsidiaries would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is not enough to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company and its domestic subsidiaries will make contribution for the deficit by next March.

Certain subsidiaries located in Mainland China maintain defined benefit retirement (resignation) plans with relative contribution scheme. The employees and the subsidiaries contribute an amount relatively based on a certain percentage of the monthly basic salary depending on the employee's position. When an employee retires or resigns, the total contribution from the employee is reimbursed based on the accumulated contribution (without interest) less withdrawals made by the employee in advance during the service period. The employee is also entitled to receive benefits calculated based on the accumulated

contribution (without interest) from the related subsidiary multiplied by the approved benefit percentage for the employee's service years less withdrawals made by the employee in advance during the service period. The scheme mentioned above ceased on August 1, 2004. The amount contributed before was archived, and the payment scheme was not changed.

- (b) For the aforementioned pension plan, the Group recognised pension costs of \$19,700, \$26,415, \$58,750 and \$77,200 for the three months and nine months ended September 30, 2018 and 2017, respectively.
- (c) Expected contributions to the defined benefit pension plans of the Group within one year from September 30, 2018 are \$54,866.

B. Defined contribution plans

- (a) Effective July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the "New Plan") under the Labor Pension Act, covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment. The pension costs under the defined contribution pension plans of the Company and its domestic subsidiaries for the three months and nine months ended September 30, 2018 and 2017 were \$104,686, \$85,845, \$308,336 and \$252,094, respectively.
- (b) Other overseas companies have defined contribution plans in accordance with the local regulations.

(17) Share capital

- A. In accordance with the Company's Articles of Incorporation, the total authorised common stock is 4 billion shares (including 100 million shares for stock warrants conversion). As of September 30, 2018, the total issued and outstanding common stock was 2,597,543 thousand shares with par value of \$10 (in dollars) per share.
- B. On December 20, 2004, the Board of Directors of the Company adopted a resolution that allowed certain stockholders to issue 16 million units of global depository receipts (GDRs), represented by 80 million shares of common stock (Deposited Shares), with one unit of GDR representing 5 shares of common stock. After obtaining approval from SFB, these GDRs were listed on the Securities Exchange of Luxembourg, with total proceeds of US\$134,666 thousand. The issuance of GDRs was represented by outstanding shares, therefore, there is no dilutive effect on the common shares' equity. The main terms and conditions of the GDRs are as follows:

(a) Voting rights

GDR holders may, pursuant to the Depositary Agreement and the relevant laws and regulations of the R.O.C., exercise the voting rights pertaining to the underlying common shares represented by the GDRs.

(b) Redemption of GDRs

For sales and redemption of the underlying common shares represented by the GDRs when the holders of the GDRs request the Depository to redeem the GDRs in accordance with the relevant R.O.C. regulations and the provisions in the Depository Agreement, the Depository may (i) deliver the underlying common shares represented by the GDRs to the GDR holders, or (ii) sell the underlying common shares represented by the GDRs in the R.O.C. stock market on behalf of the GDR holder. The payment of proceeds from such sale shall be made subject to the relevant R.O.C. laws and regulations and the provisions in the Depository Agreement.

(c) Distribution of dividends, preemptive rights and other rights

Distribution of dividends, preemptive rights and other rights and interests of GDR units bear the same rights as common shares.

(d) After considering the stock dividend distribution year by year, as of September 30, 2018, there were 694 thousand units outstanding, representing 3,469 thousand common shares of the Company's common stock.

(18) Capital surplus

Pursuant to the R.O.C. Company Law, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Law requires that the amount of capital surplus to be capitalised mentioned above should not exceed 10% of the paid-in capital each year. Capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

(19) Retained earnings

A. Under the Company's Articles of Incorporation approved by the shareholders on June 8, 2016, the current year's earnings, if any, shall be distributed in the following order:

(a) Payment of all taxes and dues.

(b) Offset against prior years' operating losses, if any.

(c) Set aside 10% of the remaining amount as legal reserve, unless the accumulated amount of the legal reserve has reached the total authorized capital of the Company.

(d) Setting aside or reversing a special reserve according to relevant regulations when necessary.

(e) The remainder along with beginning unappropriated earnings shall be stockholders' bonus. The appropriation of earnings shall be proposed by the Board of Directors and resolved by the shareholders. As the Company is in the growth stage, and taking into consideration the shareholders' benefits, financial health and business development, the amount of bonus distributed to shareholders shall be no less than 60% of the distributable earnings for the current period. Cash dividends shall be at least 15% of the bonus distributed to shareholders.

B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their

share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.

- C. (a) In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
- (b) The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Jin-Guan-Zheng-Fa-Zi Letter No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently. Such amounts are reversed upon disposal or reclassified if the assets are investment property of land, and reversed over the use period if the assets are investment property other than land.
- D. The appropriations of 2017 and 2016 earnings had been approved by the shareholders during their meeting on June 11, 2018 and June 13, 2017, respectively. Details are summarised below:

	Years ended December 31,

B. Financial risk management policies

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial position and financial performance. The Group uses derivative financial instruments to hedge certain risk exposures (see Notes 6(2) and 6(14)).

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- i. The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the USD, RMB and EUR. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.
- ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. To manage their foreign exchange risk arising from future commercial transactions and recognised assets and liabilities, entities in the Group use forward foreign exchange contracts, foreign exchange swap contracts and options, transacted with Group treasury.

- iii. The Group adopts the derivative financial instruments like forward exchange contracts / forward exchange transactions, etc. to hedge the fair value risk and cash flow risk due to foreign exchange rate fluctuations. The Group monitors at any time and pre-sets a “stop loss” amount to limit its foreign exchange risk.
- iv. The Group’s businesses involve some non-functional currency operations (the Company’s and certain subsidiaries’ functional currency: NTD; other certain subsidiaries’ functional currency: USD and RMB). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

Price risk

- i. The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio.
- ii. The Group's investments in equity securities comprise shares issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, post-tax profit for the nine months ended September 30, 2018 and 2017 would have increased/decreased by \$34,231 and \$442, respectively, as a result of gain/loss on equity securities classified as at fair value through profit or loss. Other components of equity would have increased/decreased by \$29,795 and \$61,969 for the nine months ended September 30, 2018 and 2017, as a result of other comprehensive income for financial assets at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

- i. The Group's main interest rate risk arises from long-term borrowings with variable rates, which expose the Group to cash flow interest rate risk. The Group primarily borrowed at fixed rate and floating rate. During the nine months ended September 30, 2018 and 2017, the Group's borrowings at variable rate were denominated in NTD, USD, JPY and EUR.
 - ii. If the interest rate increases by 0.25%, and all other conditions are the same, the impact on post-tax profit would decrease by \$2,881 and \$1,070 for the nine months ended September 30, 2018 and 2017, respectively, resulting from the variable rate borrowings.
- (b) Credit risk
- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms, and the contract cash flows of financial instruments which were settled in accordance with trading conditions.
 - ii. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors.
 - iii. Individual risk limits are set based on internal or external ratings in accordance with limits set by the credit controller. The utilisation of credit limits is regularly monitored.
 - iv. For banks and financial institutions, only well rated parties are accepted.

- v. The Group adopts the assumption under IFRS 9, that if the contract payments are past due over 180 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.
- vi. The Group adopts the assumption under IFRS 9, that the default occurs when the contract payments are not expected to be recovered and are transferred to overdue receivables.
- vii. The Group classifies customer's accounts receivable and contract assets in accordance with customer types. The Group applies the simplified approach using provision matrix, loss rate methodology to estimate expected credit loss under the provision matrix basis.
- viii. The Group uses the forecastability to adjust historical and timely information to assess the default possibility of accounts receivable and contract assets. On September 30, 2018, the provision matrix is as follows:

	<u>Not past due</u>	<u>1-90 days past due</u>	<u>91-180 days past due</u>
<u>At September 30, 2018</u>			
Expected loss rate	0.00%	1.47%	18.72%
Total book value	\$ 45,911,586	\$ 3,309,944	\$ 464,719

Loss allowance	\$ 167,086	\$ 793,068	\$ 1,097,182

- ix. Movements in relation to the Group applying the simplified approach to provide loss allowance for notes receivable, accounts receivable, contract assets and overdue receivables are as follows:

	<u>Nine months ended September 30, 2018</u>				
	<u>Notes receivable</u>	<u>Accounts receivable</u>	<u>Contract assets</u>	<u>Overdue receivables</u>	<u>Total</u>

For provisioned loss for the nine months ended September 30, 2018, the reversal gain of impairment arising from customers' contracts amounted to \$32,375.

- x. Credit risk information for 2017 is provided in Note 12(4).

(c) Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs.
- ii. The table below analyses the Group's non-derivative financial liabilities (including non-current disposal group classified as held for sale) and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities:

Non-derivative financial liabilities:

Long-term borrowings (including current portion)	42,853	25,485,776	184,388	246,104

Derivative financial liabilities:

As of September 30, 2018, December 31, 2017 and September 30, 2017, the Group's derivative financial liabilities are due within 1 year.

iii. The Group does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis to be significantly earlier, nor expect the actual cash flow amount to be significantly different.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

B. Financial instruments not measured at fair value, the carrying amounts of cash and cash equivalents, notes receivable, accounts receivable, other receivables, short-term borrowings, notes payable, accounts payable, other payables and long-term borrowings (including current portion), current portion are approximate to their fair values.

C. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities is as follows:

D. The methods and assumptions that the Group used to measure fair value are as follows:

- (a) The instruments that the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	<u>Listed shares</u>	<u>Convertible (exchangeable) bond</u>
Market quoted price	Closing price	Closing price

- (b) Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques that are approved for financial management.
- (c) When assessing non-standard and low-complexity financial instruments, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- (d) The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.
- (e) The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using the valuation model is adjusted accordingly with additional inputs. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
- (f) The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty.
- E. For the nine months ended September 30, 2018 and 2017, there was no transfer between Level 1 and Level 2.
- F. The following chart is the movement of Level 3 for the nine months ended September 30, 2018 and 2017:

	2018	2017
	<u>Equity securities</u>	<u>Equity securities</u>

G. During the nine months ended September 30, 2017, certain Level 3 equity securities became listed on the exchange or as emerging stock, resulting in the availability of sufficient observable market information for these securities. These equity securities were transferred from Level 3 into Level 1 at the end of the month in which they were listed.

H. Investment department is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions and periodical review. Investment property is evaluated regularly by the Group's financial treasury based on the valuation methods and assumptions announced by the Financial Supervisory Commission, Securities and Futures Bureau.

The capital department establishes valuation policies, valuation processes and ensures compliance with the related requirements in IFRS. The related valuation results are reported to the management monthly. The management is responsible for managing and reviewing valuation processes.

I. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at September 30, 2018	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Unlisted shares	\$ 3,063,624	Net asset value	Not applicable	-	Not applicable

	Fair value at December 31, 2017	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value

	Fair value at September 30, 2017	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Unlisted shares	\$ 1,706,767	Net asset value	Not applicable	-	Not applicable

- J. The Group has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in different measurement. The following is the effect of profit or loss or of other comprehensive income from financial assets and liabilities categorised within Level 3 if the inputs used to valuation models have changed:

(4) Effects on initial application of IFRS 9 and information on application of IAS 39 in 2017

A. Summary of significant accounting policies adopted in the third quarter of 2017:

(a) Financial assets at fair value through profit or loss

- i. They are financial assets held for trading or financial assets designated as at fair value through profit or loss on initial recognition. Financial assets are classified in this category of held for trading if acquired principally for the purpose of selling in the short-term. Derivatives are also categorized as financial assets held for trading unless they are designated as hedges. Financial assets that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:
 - (i) Hybrid (combined) contracts; or
 - (ii) They eliminate or significantly reduce a measurement or recognition inconsistency; or
 - (iii) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.
- ii. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- iii. Financial liabilities at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed in profit or loss. These financial liabilities are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial liabilities are recognised in profit or loss. Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments are presented in 'financial assets at cost'.

(b) Available-for-sale financial assets

- i. They are non-derivatives that are either designated in this category or not classified in any of the other categories.
- ii. On a regular way purchase or sale basis, available-for-sale financial assets are recognised and derecognised using trade date accounting.
- iii. They are initially recognised at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in other comprehensive income. Investments in

equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments are presented in 'financial assets at cost'.

(c) Loans and receivables

Accounts receivable

Accounts receivable are loans and receivables originated by the entity. They are created by the entity by selling goods or providing services to customers in the ordinary course of business. They are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. However, short-term accounts receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(d) Impairment of financial assets

- i. The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.
- ii. The criteria that the Group uses to determine whether there is objective evidence of an impairment loss is as follows:
 - (i) Significant financial difficulty of the issuer or debtor;
 - (ii) A breach of contract, such as a default or delinquency in interest or principal payments;
 - (iii) The Group, for economic or legal reasons relating to the borrower's financial difficulty, granted the borrower a concession that a lender would not otherwise consider;
 - (iv) It becomes probable that the borrower will enter bankruptcy or other financial reorganisation;
 - (v) The disappearance of an active market for that financial asset because of financial difficulties;
 - (vi) Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial asset in the group, including adverse changes in the payment status of borrowers in the group or national or local economic conditions that correlate with defaults on the assets in the group;

- (vii) Information about significant changes with an adverse effect that have taken place in the technology, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered;
 - (viii) A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.
- iii. When the Group assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:

(i) Financial assets at amortised cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, and is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortised cost that would have been at the date of reversal had the impairment loss not been recognised previously. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(ii) Financial assets at cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at current market return rate of similar financial asset, and is recognised in profit or loss. Impairment loss recognised for this category shall not be reversed subsequently. Impairment loss is recognised by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(iii) Available-for-sale financial assets

The amount of the impairment loss is measured as the difference between the asset's acquisition cost (less any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss, and is reclassified from 'other comprehensive income' to 'profit or loss'. If, in a subsequent period, the fair value of an investment in a debt instrument increases, and the increase can be related objectively to an event occurring after the impairment loss was recognised, such impairment loss is reversed through profit or loss. Impairment loss of an investment in an equity instrument recognised in profit or loss shall not be reversed through profit or loss. Impairment loss is recognised

and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(e) Derivative financial instruments and hedging activities

- i. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Any changes in the fair value are recognised in profit or loss.
- ii. The Group designates certain derivatives as either:
 - (i) Hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedge);
 - (ii) Hedges of a particular risk associated with a recognised asset or liability or a highly probable forecast transaction (cash flow hedge); or
 - (iii) Hedges of a net investment in a foreign operation (net investment hedge).
- iii. The Group documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.
- iv. The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months. Trading derivatives are classified as current assets or liabilities.
- v. Fair value hedge
 - (i) Changes in the fair value of derivatives that are designated and qualified as fair value hedges are recorded in profit or loss, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.
 - (ii) If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortised to profit or loss over the period to maturity.
- vi. Cash flow hedge
 - (i) For fair value changes in derivative instruments that designated as and meet with cash flow hedges, the effective portion is recognised in other comprehensive income; the gain or loss relating to the ineffective portion is recognised in the statement of comprehensive income within 'other gains and losses'.
 - (ii) When a hedging instrument expires, or is sold, cancelled or executed, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or

loss existing in other comprehensive income at that time remains in other comprehensive income. When a forecast transaction occurs or is no longer expected to occur, the cumulative gain or loss that was reported in other comprehensive income is transferred to profit or loss in the periods when the hedged forecast cash flow affects profit or loss.

vii. Net investment hedge

- (i) Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges.
- (ii) Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss.
- (iii) Gains and losses accumulated in other comprehensive income are included in profit or loss when the foreign operation is disposed of or sold.

B. The reconciliations of carrying amount of financial assets transferred from December 31, 2017, IAS 39, to January 1, 2018, IFRS 9, are as follows:

	IAS 39	Effects								
		Available- for-sale-equity	Available- for-sale-liability	Measured at cost	Retained earnings	Other equity				
IFRS 9										
Transferred into and measured at fair value through profit or loss	\$	3,126,535	\$	71,600	\$	434,369	\$	-	\$	-
Transferred into and measured at fair value through other comprehensive income -equity		2,663,623		-		713,303		-		-
Impairment loss adjustment		-		-		-		626,735	(626,735)
Fair value adjustment		-		-		-		492,181	(492,181)

- (a) Under IAS 39, as the cash flows of debt instruments which were classified as available-for-sale financial assets without active market, amounting to \$71,600, do not meet the condition that it is intended to settle the principal and interest on the outstanding principal balance, they were reclassified as "financial assets at fair value through profit or loss", which resulted to an increase in retained earnings and decrease in other equity interest in the amounts of \$6,600 and \$6,600 on initial application of IFRS 9, respectively.
- (b) Under IAS 39, as the equity instruments which were classified as available-for-sale financial assets and financial assets at cost, amounting to \$2,663,623 and \$713,303, respectively, were not held for the purpose of trading, they were reclassified as "financial assets at fair value through other comprehensive income (equity instruments)", which resulted to an increase in retained earnings and decrease in other equity interest in the amounts of \$626,735 and \$626,735 on initial application of IFRS 9, respectively.

(c) Under IAS 39, the equity instruments, which were classified as available-for-sale financial assets and financial assets at cost, amounting to \$3,126,535 and \$434,369, respectively, were reclassified as "financial assets at fair value through profit or loss (equity instruments)", which resulted to an increase in retained earnings and decrease in other equity interest in the amounts of \$485,581 and \$485,581 under IFRS 9, respectively.

C. The significant accounts as of December 31, 2017, September 30, 2017 and the third quarter of 2017 are as follows:

(a) Financial assets at fair value through profit or loss

<u>Items</u>	<u>December 31, 2017</u>	<u>September 30, 2017</u>

- i. The Group recognised net loss amounting to \$36,873 and \$18,061 on financial assets held for trading for the three months and nine months ended September 30, 2017, respectively. No net profit was recognised on financial assets at fair value through profit or loss for the three months and nine months ended September 30, 2017.
- ii. The counterparties of the Group's private placement of convertible bonds are mostly listed companies in Taiwan and overseas. The Group expects that the counterparties of the private placement of convertible bonds that it invested in are not likely to default.
- iii. The non-hedging derivative instruments transaction and contract information are as follows:

The Group entered into forward foreign exchange contracts to sell (buy) to hedge exchange rate risk of (import) export proceeds. However, these forward foreign exchange contracts did not meet with the condition of hedge accounting and were not accounted for under hedge accounting.

- iv. The Group has no financial assets at fair value through profit or loss pledged to others as collateral.

(b) Available-for-sale financial assets

Items	December 31, 2017	September 30, 2017
Current items:		
Listed stocks	\$ 1,197,724	\$ 1,239,400
Emerging stocks	58,943	262,525
Convertible bonds	65,000	65,000

Accumulated impairment	(231,723)	(231,723)
	\$ 4,720,058	\$ 4,807,009

- i. The Group recognised loss of \$80,538 and \$187,820 in other comprehensive income for fair value change and reclassified \$47,737 and \$148,240 from equity to profit or loss for the three months and nine months ended September 30, 2017, respectively.
- ii. At period end, there was a significant decline in the net value of stock investment held by the Group below its original cost. For the nine months ended September 30, 2017, the Group recognised impairment loss of \$20,569.
- iii. The Group has no available-for-sale financial assets pledged to others as collateral.

(c) Financial assets at cost

Items	December 31, 2017	September 30, 2017
Non-current items:		
Unlisted shares	\$ 1,181,036	\$ 1,101,305
Accumulated impairment	(33,364)	(18,360)
	\$ 1,147,672	\$ 1,082,945

According to the Group's intention, its investment in stocks should be classified as 'available-for-sale financial assets'. However, as stocks are not traded in active market, and no sufficient industry information of companies cannot be obtained, the fair value of the investment cannot be measured reliably. The Group classified those stocks as 'financial assets at cost'.

D. Credit risk information on December 31, 2017 , September 30, 2017 and the third quarter of 2017 are as follows:

(a) Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations as described below:

- i. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors.
- ii. Individual risk limits are set based on internal or external ratings in accordance with limits set by the manager of credit control. The utilisation of credit limits is regularly monitored.
- iii. For banks and financial institutions, only well rated parties are accepted.
- iv. Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transaction.

- (b) For the year ended December 31, 2017 and third quarter of 2017, the management does not expect any significant losses from non-performance by these counterparties.
- (c) The credit quality of accounts receivable that were neither past due nor impaired was in the following categories based on the Group's credit quality control policy:

	<u>December 31, 2017</u>	<u>September 30, 2017</u>
Group 1	\$ 22,112,811	\$ 23,059,701
Group 2	<u>23,203,271</u>	<u>22,148,984</u>
	<u>\$ 45,316,082</u>	<u>\$ 45,208,685</u>

Group 1: Medium to low risk customers: These customers include large enterprise groups which are operating well, and in which financial transparency is high and approved by the headquarters' credit controller as well as government and educational institutions.

Group 2: Normal risk customers: Customers other than the medium to low risk customers.

(5) Effects of initial application of IFRS 15 and information on application of IAS 11 and IAS 18 in 2017

A. The significant accounting policies applied on revenue recognition for the year ended December 31, 2017 and the third quarter of 2017 are set out below:

(a) Sales of goods

The Group is mainly engaged in manufacturing and sales of information, electric machinery, power supply, industrial automation, networking and communication equipment and components and its related products. Revenue is measured at the fair value of the consideration received or receivable taking into account of business tax, returns, rebates and discounts for the sale of goods to external customers in the ordinary course of the Group's activities. Revenue arising from the sales of goods is recognised when the Group has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods is completed when the significant risks and rewards of ownership have been transferred to the customer, the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied.

(b) Sales of services

The Group provides installation of certain software and module and energy technology services. Revenue is recognised if all of the following conditions are met and the cost incurred shall be recognised as the cost in the current period. If loss is expected to incur on the transaction, loss shall be recognised immediately.

- i. The amount of the revenue can be measured reliably;
- ii. It is probable that the economic benefits related to the transaction will flow to the enterprise;
- iii. The costs incurred and to be incurred associated with the transaction can be measured reliably; and
- iv. The degree of completion of the transaction can be measured reliably at the balance sheet date.

B. The revenue recognised by using above accounting policies for the three months and nine months ended September 30, 2017 are as follows:

	<u>Three months ended September 30, 2017</u>	<u>Nine months ended September 30, 2017</u>
Sales revenue	\$ 58,140,287	\$ 157,712,477
Service revenue	806,908	2,130,393
Other operating income	<u>875,281</u>	<u>2,377,595</u>
	<u>\$ 59,822,476</u>	<u>\$ 162,220,465</u>

C. The effects and description on current balance sheet and comprehensive income statement if the Group continues adopting above accounting policies are as follows:

	<u>September 30, 2018</u>		
<u>Balance sheet items</u>	<u>Balance by using IFRS 15</u>	<u>Balance by using previous accounting policies</u>	<u>Effects from changes in accounting policy</u>
Accounts receivable, net	\$ 49,823,686	\$ 51,040,133	(\$ 1,216,447)
Contract assets-current	1,979,603	-	1,979,603
Contract assets-non-current	523,264	-	523,264
Other non-current assets	2,574,213	3,097,477	(523,264)
Contract liabilities-current	(2,964,771)	-	(2,964,771)
Other current liabilities	(4,598,493)	(6,800,108)	2,201,615

There is no effect on comprehensive income.

- (a) Customer contracts where services were rendered but not yet billed, were previously presented as accounts receivable on that balance sheet, and are recognised as contract assets in accordance with IFRS 15 ‘Revenue from contracts with customers’.
- (b) Expected sales discounts and allowances were previously presented as accounts receivable - allowance, and reclassified as refund liabilities (shown as ‘other current liabilities’) under IFRS 15 ‘Revenue from contracts with customers’.
- (c) Advance sales receipts in relation to customer contracts under IFRS 15 ‘Revenue from contracts with customers’ are recognised as contract liabilities.

14. OPERATING SEGMENT INFORMATION

(1) General information

The Group's management has determined the reportable segments based on the reports reviewed by the Board of Directors that are used to make strategic decisions. The Group considers the business from a product perspective. The Group's business is segregated into power electronics business,

automation business and infrastructure business. Breakdown of the revenue from all sources is as follows:

- A. Power electronics: Component, Embedded Power, Fans and Thermal Management, Automotive Electronics, Merchant & Mobile Power and Vivitek Projectors.
- B. Automation: Industrial Automation and Building Automation.
- C. Infrastructure: ICT Infrastructure and Energy Infrastructure.

Because of the change of product classification, the Group's internal business segment restructured accordingly. The prior period information was restated for comparison.

(2) Measurement of segment information

The Group's segment profit (loss) is measured with the operating profit (loss) before tax, which is used as a basis for the Group in assessing the performance of the operating segments. The accounting policies of the operating segments are in agreement with the significant accounting policies summarized in Note 4.

(3) Segment information

The segment information provided to the chief operating decision-maker for the reportable segments is as follows:

	Nine months ended September 30, 2018			
	Power electronics business	Automation business	Infrastructure business	Total
Revenue from external customers	\$ 86,954,827	\$ 28,250,676	\$ 56,087,145	\$ 171,292,648

Note 1: The numbers filled in for the transaction company in respect of inter-company transactions are as follows:

(1) Parent company is '0'.

(2) The subsidiaries are numbered in order starting from '1'.

Note 2: Relationship between transaction company and counterparty is classified into the following three categories:

(1) Parent company to subsidiary.

(2) Subsidiary to parent company.

(3) Subsidiary to subsidiary.

Note 3: Regarding percentage of transaction amount to consolidated total operating revenues or total assets, it is computed based on period-end balance of transaction to consolidated total assets for balance sheet accounts and based on accumulated transaction amount for the period to consolidated total operating revenues for income statement accounts.

Note 4: There is no similar transaction to compare with. It will follow the agreed price and transaction terms and all the credit terms are 70 days.

Note 5: Lending of capital

Note 6: Selling price was calculated based on the cost plus handling charges and necessary processing costs. The credit term to related parties is 60-90 days after monthly billings, while 30-120 days after monthly billings for the third parties.

Note 7: Sales revenue is cost plus necessary profit, the collection term for related parties is 75 days from next month.

Note 8: The disclosure requirement for the above disclosed amounts is 1% of the consolidated total assets for balance sheet accounts and 1% of the consolidated total revenue for income statement accounts.
